

Document Title

**Summary of the residues in or on treated products,
food and feed with regard to the representative formulation
isoxaflutole + cyprosulfamide SC 480 (240+240g/L)**

Data Requirements

**EU Regulation 1107/2009 & EU Regulation 284/2013
Document MCP**

Section 8: Residues in or on treated products, food and feed

According to the guidance document, SANCO/10181/2013, for
preparing dossiers for the approval of a chemical active substance

M-472501-01-2

Date

2013-11-29

CP 8 RESIDUES IN OR ON TREATED PRODUCTS, FOOD OR FEED

The formulation IFT + CSA SC 480 (also called Merlin[®] Flexx) is a suspension concentrate (SC) containing 240 g/L of isoxaflutole and 240 g/L of the safener cyprosulfamide. IFT + CSA SC 480 is intended to be used until growth stage BBCH 13 on maize and in pre-emergence on sweet corn at rates up to 100 g isoxaflutole/ha and 100 g cyprosulfamide/ha.

The uses of the formulation IFT + CSA SC 480 on maize and sweet corn are the representative uses supported in the Annex II dossier for isoxaflutole renewal. Please refer to document M section KCA 6 of the Annex II dossier for isoxaflutole renewal where all relevant metabolism and residue data in support of these uses are summarized.

Based on the available information on isoxaflutole, it can be concluded that the use of the formulation IFT + CSA SC 480 on maize and sweet corn - according to the supported GAPs - is unlikely to present a public health concern.

This document is copyright protected (equivalent to a patent). Any distribution, reproduction or publication requires the consent of Bayer AG (or its respective affiliates) or any other commercial purpose is prohibited and constitutes a violation of the underlying license agreement.
